Subject: Motion To Amend Recommendations For The Puffin Inn

I, Sumner Nystedt, would like to make a motion to accept the revised plans submitted by Tim and Michelle Tourangeau with the following recommendations. As with the initial proposal, on the front side of the proposed building we would like to see matching shutters with the main building, to better tie the property together. Also, the use of the agreed upon faux barn door to the right of the garage in order to give the structure a degree of aesthetic appeal. In the rear, we suggest some form of vegetative barrier to soften the appearance for The Gorges Grant guests.

These recommendations are based upon the applicant using the same exterior building materials as presented in the original proposal.
