

STRINGS OF LIGHTS
OZO ARTICLE 8.3

FEB 24, 2020
WORKSHOP

8.3. Lighting

A. Glare

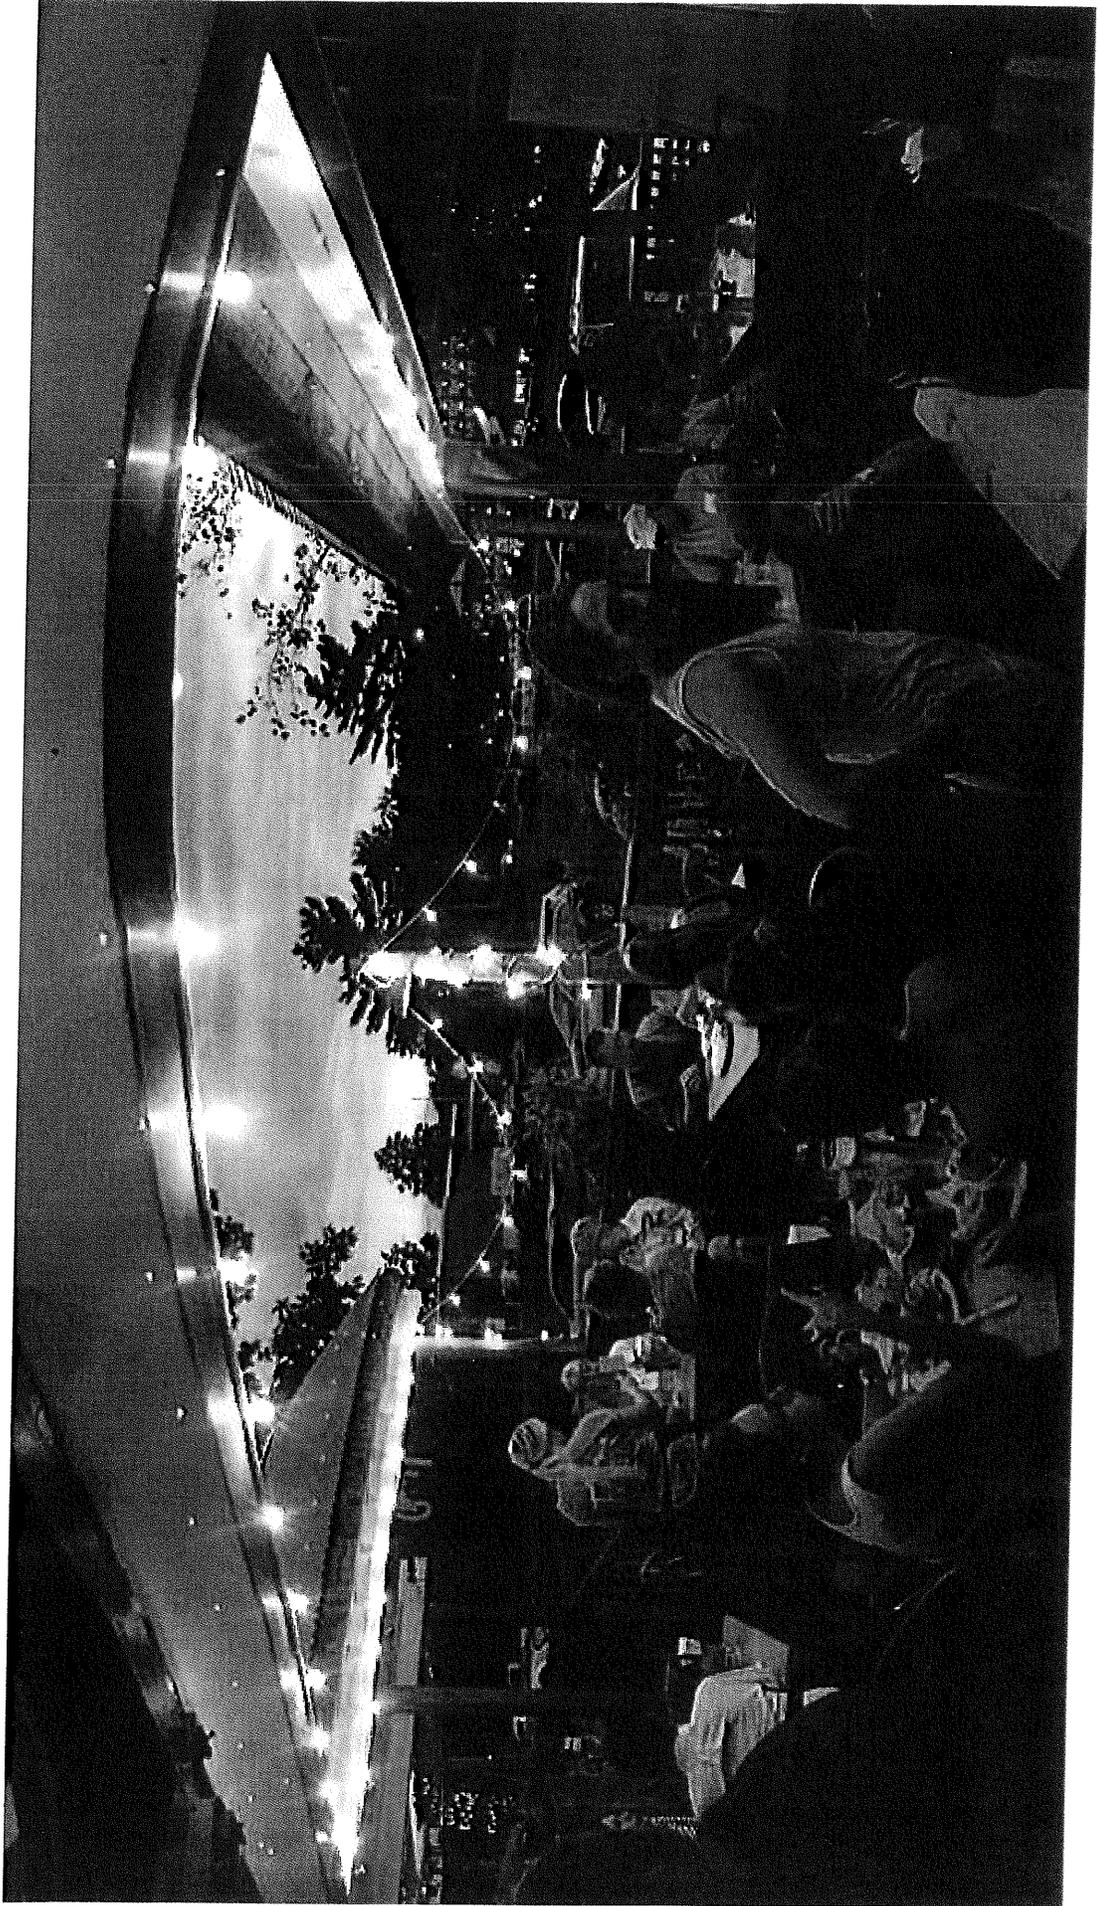

Lighting may be used which serves security, safety and operational needs but which does not directly or indirectly produce deleterious effects on abutting properties or which would impair the vision of a vehicle operator on adjacent roadways. Lighting fixtures shall be shielded or hooded so that the lighting elements are not exposed to normal view by motorists, pedestrians, or from adjacent dwellings. Direct or indirect illumination shall not exceed 0.5 foot-candles upon abutting residential properties. Any lighting fixture not meeting the above standards shall be removed or modified to meet these standards. (Amended April 8, 2002)

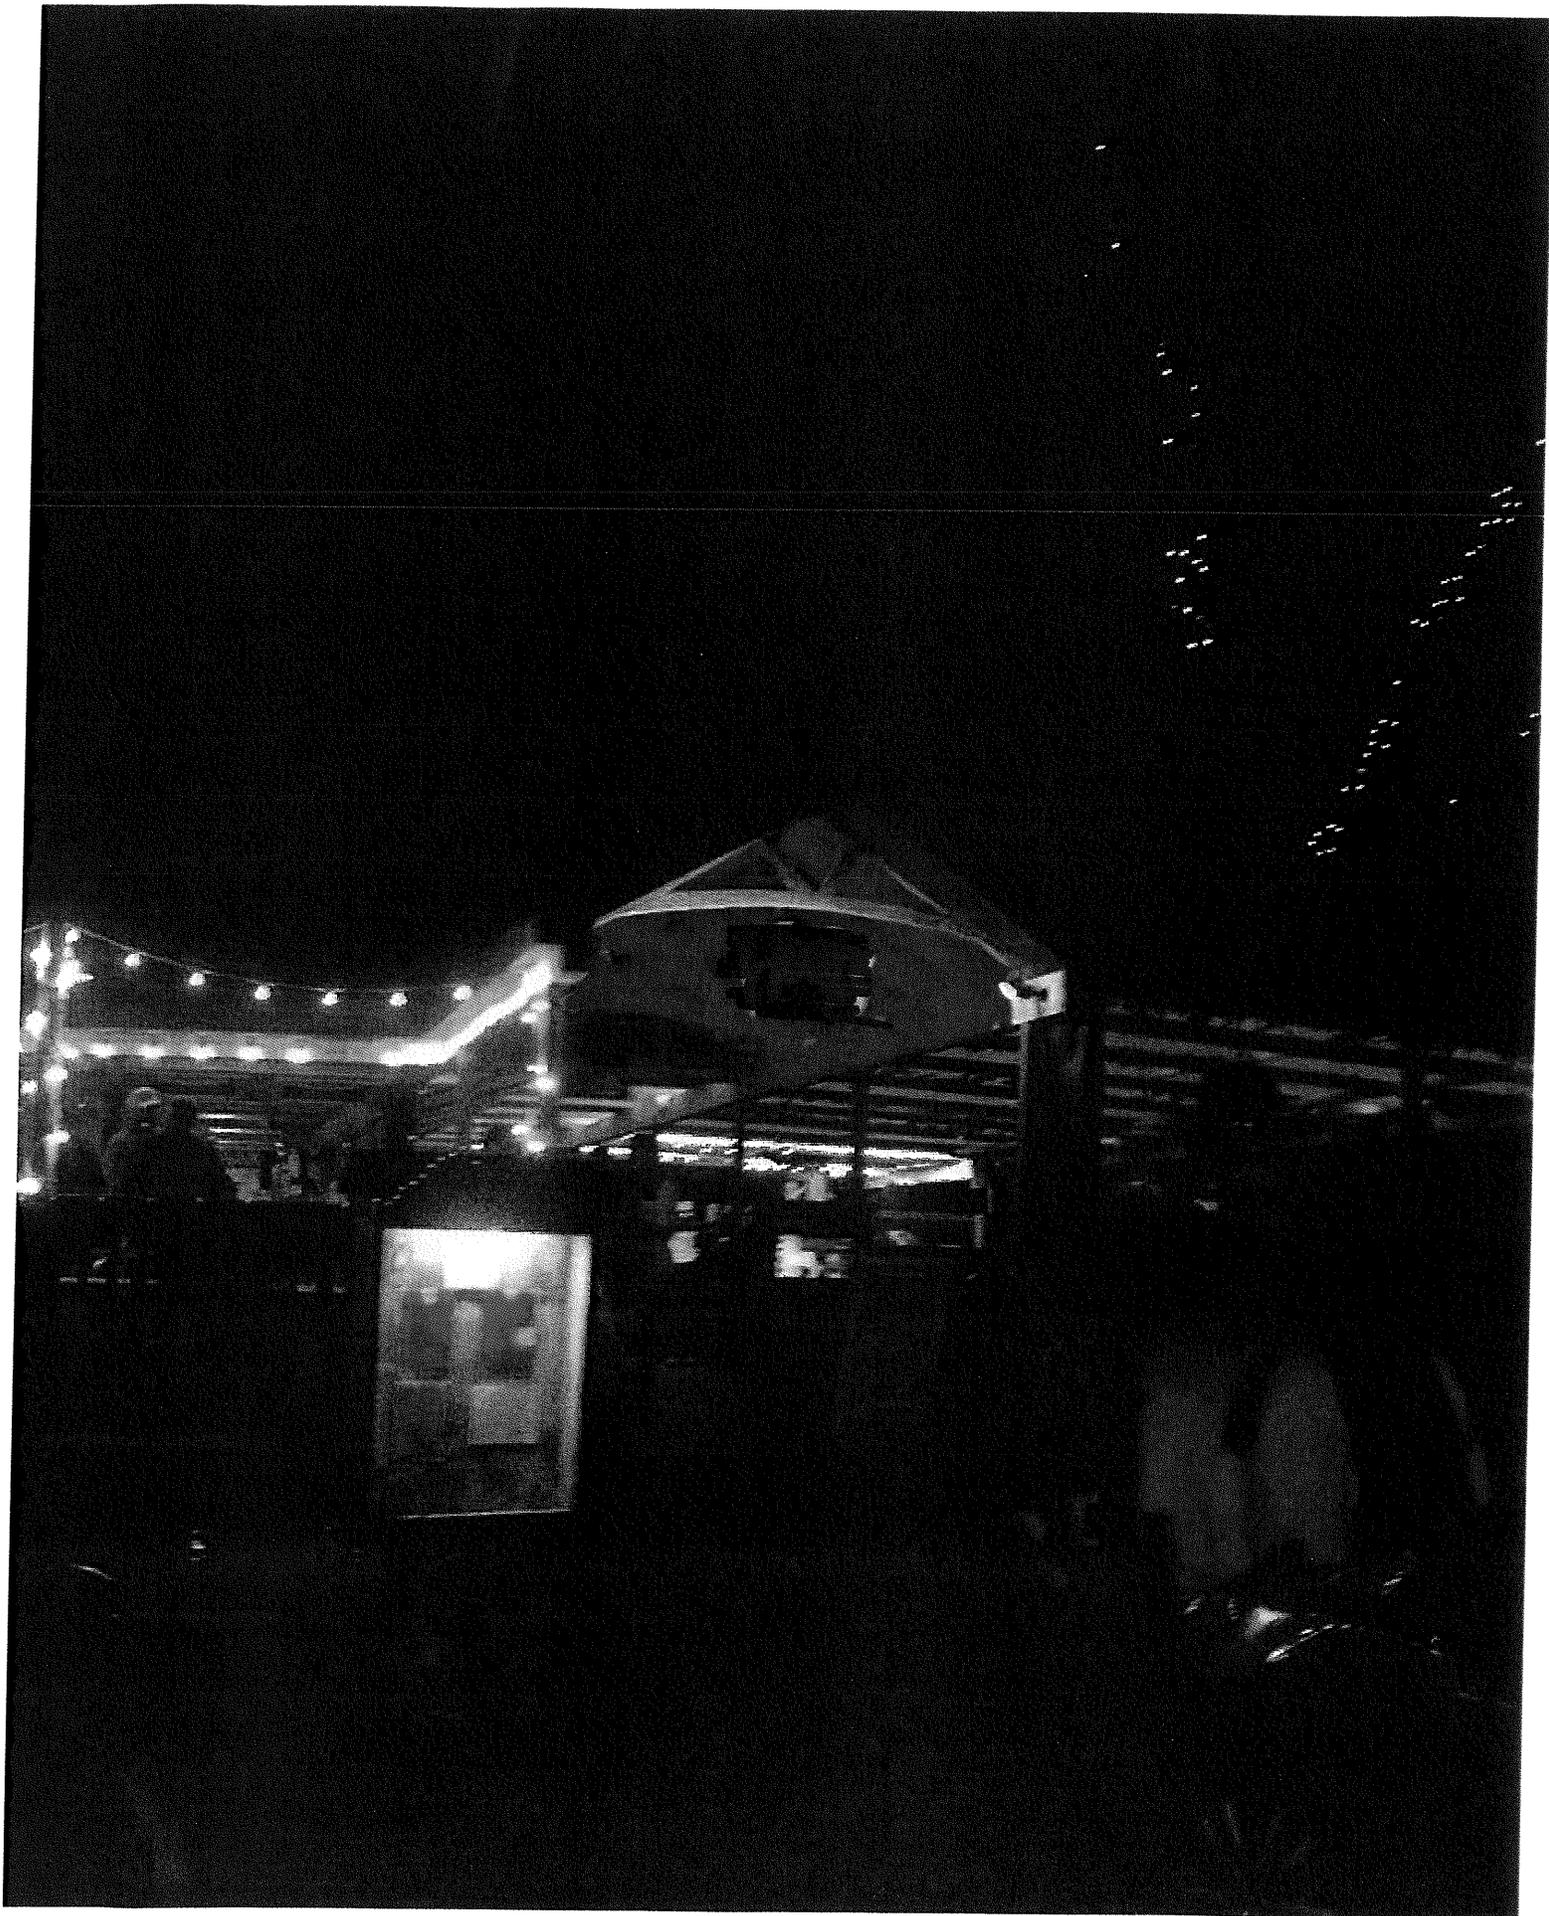

B. Outdoor Strings of Lights (Amended 6/12/12, ATM)

Strings of light bulbs are not permitted except for the holiday season from the Monday before Thanksgiving until January 21. Holiday season strings of lights may include both colored and uncolored lights.

C. Landscape Lighting (Adopted April 8, 2002)

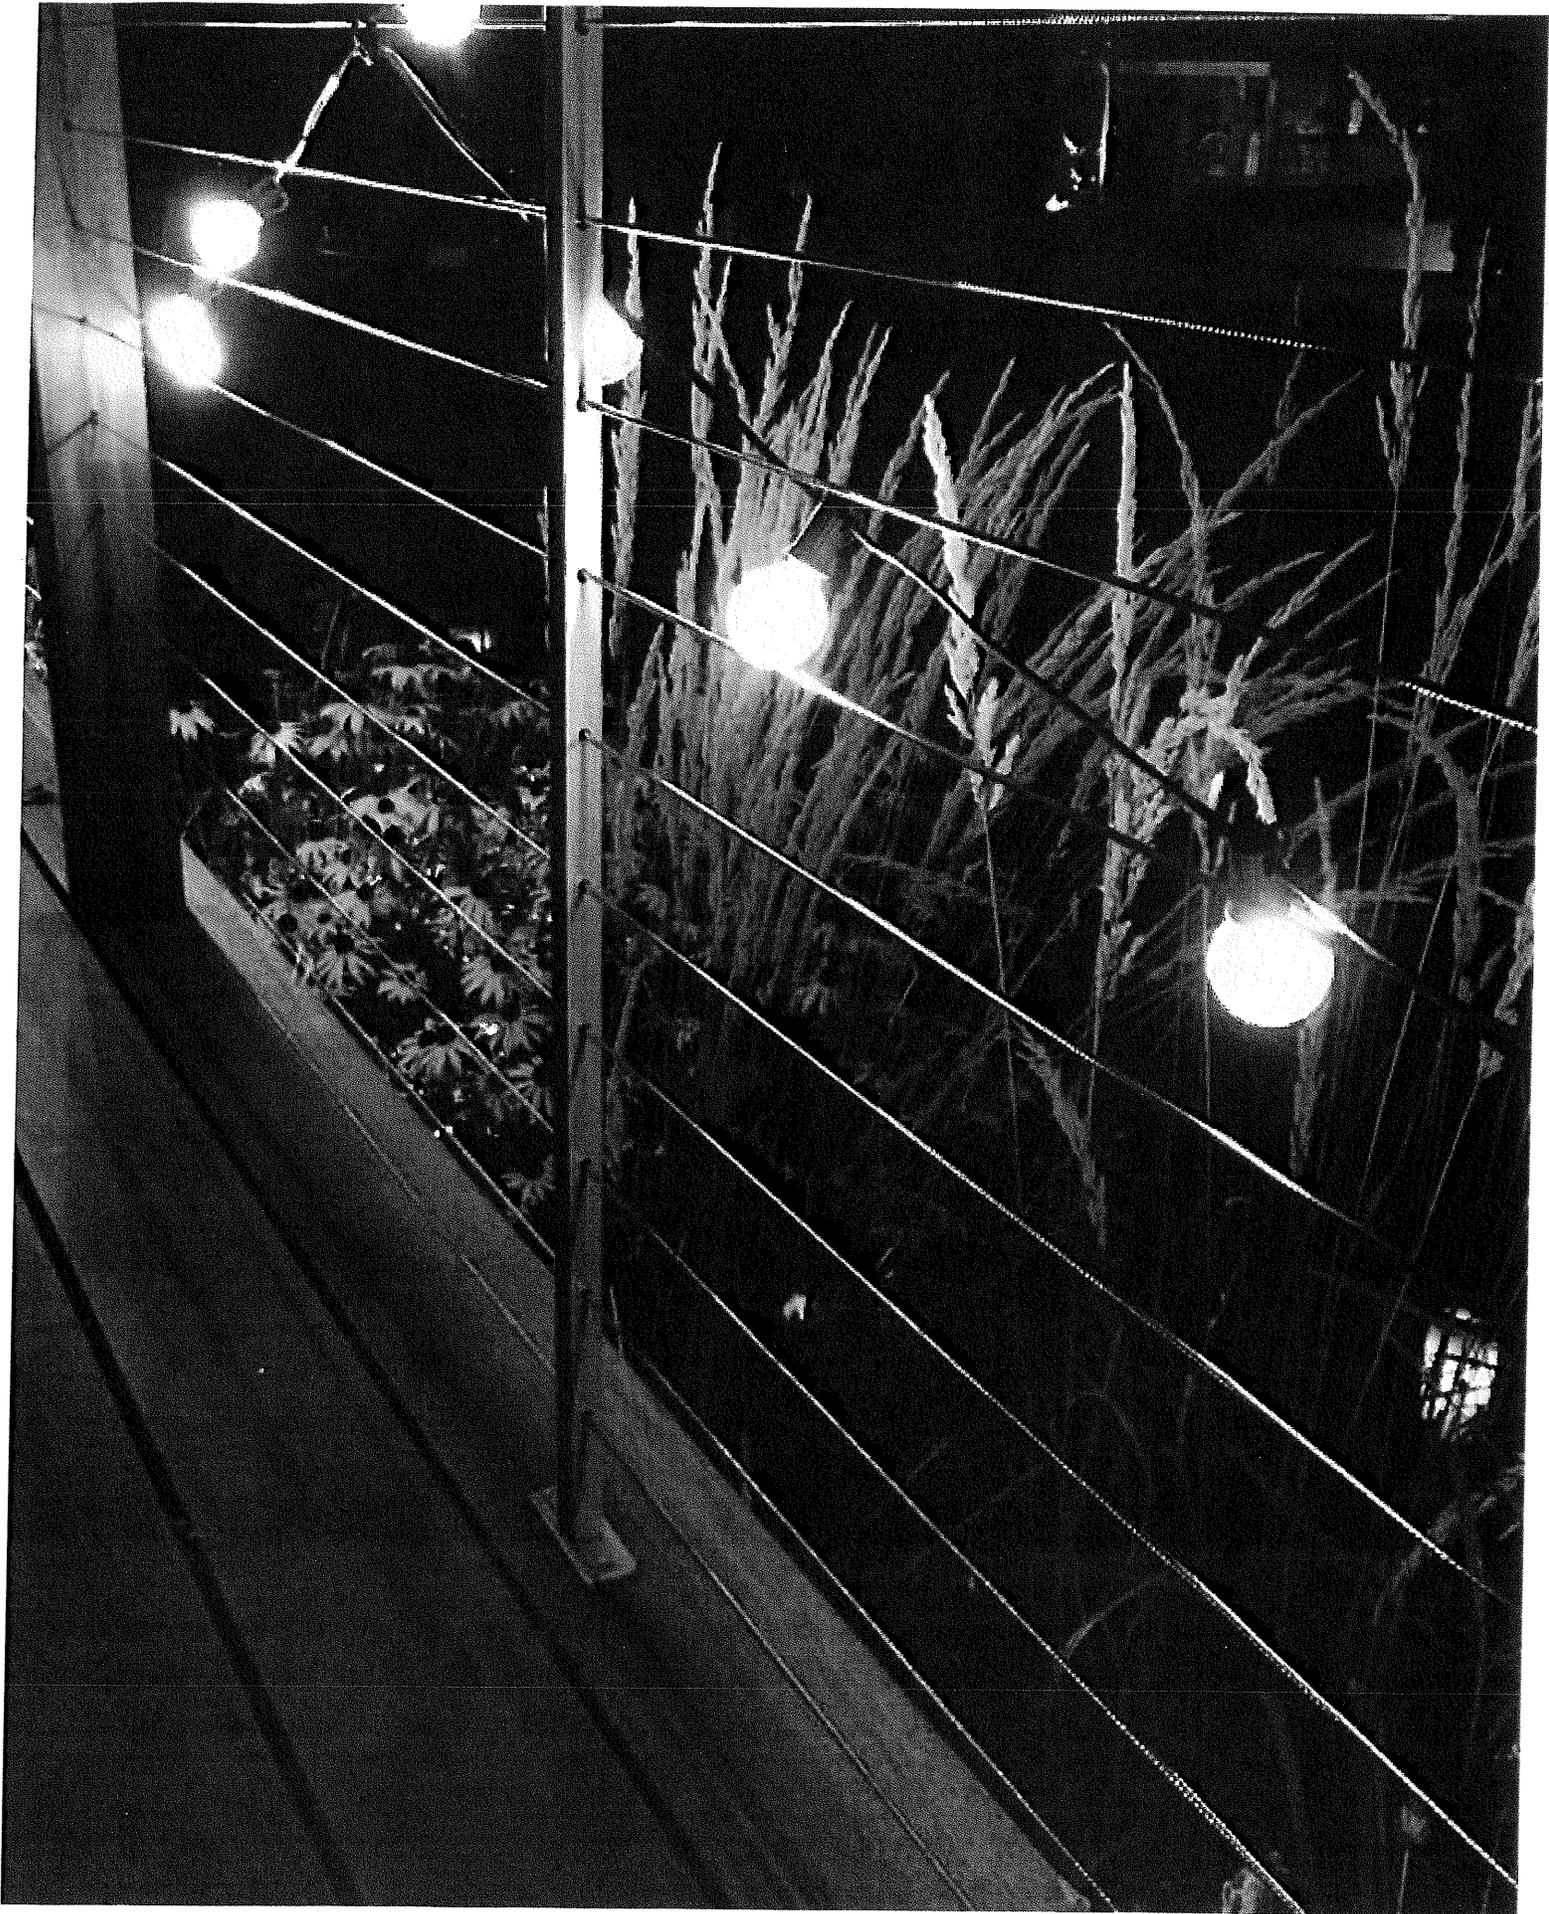

Strings of uncolored lights may also be part of a landscape design for all or part of the year. Landscape design refers to lights in live bushes or live trees (as defined in Webster's Dictionary as having living root systems in soil), but does not include lights around windows, on building facades, on fences, on walls or on roofs.

A black and white photograph of an industrial interior. The scene is dimly lit, featuring several large, glowing industrial heaters arranged in a row. A string of small, round lights hangs from the ceiling, creating a warm, ambient glow. In the background, there are various pieces of industrial equipment and what appears to be a service counter or reception area. The overall atmosphere is one of a busy, functional industrial space.
